Art Unit: 1733

1) This application contains claims directed to the following patentably distinct species of the claimed invention:

method of three dimensional printing

species A - method of three dimensional printing using a <u>first reactive</u> component in fluid and a <u>second reactive component in particulate material</u> (described as general class one at specification page 7 lines 9-11, described at specification page 9 line 14 to page 16 line 2, and apparently defined in claims 1-11, 21-42, 55-60, 112, 115-122);

species B - method of three dimensional printing using two reactive

components dispensed as a fluid (described as general class two at specification

page 7 line 11, described at page 16 line 3 to page 18 line 24, and apparently defined in claims 73-77 and 123);

particulate components in which a dispensing fluid functions to dissolve or disperse the reactants (described as general class three at specification page 7 lines 11-13, described at page 18 line 26 to page 20 line 10, and apparently defined in claims 85-105 and 124).

particulate material

species #1 - particulate material comprising a <u>cationic reactant</u> selected from the group described at specification page 10 line 14-20 (apparently defined in claims 9 and 91);

. Application/Control Number: 09/706,350

Art Unit: 1733

species # 2 - particulate material comprising <u>anionic reactant</u> selected from the group described at specification page 10 lines 20-30 (apparently defined in claims 11, 40 and 93);

species # 3 - particulate material comprising metal reactant selected from the group consisting of iron, copper, carbon steel, stainless steel, aluminum, brass, molybdenum, tungsten, magnesium and cobalt (apparently defined in claims 27 and 103);

species #4 - particulate material comprising <u>ceramic oxide reactant</u>
selected from the group consisting of alumina, anatase, silicon dioxide,
aluminum silicate and glass (apparently defined in claims 28 and 104);

species #5 - particulate material comprising mineral reactant selected from the group consisting of limestone, magnetite, calcium silicate, hydrous calcium sulfate, hydrated lime and calcium phosphate (apparently defined in claims 29 and 105);

species #6 - particulate material comprising an <u>initiator</u> selected from the group described at specification page 14 lines 17-23 (apparently defined in claim 35)

species #7 - particulate material comprising polyol group (apparently defined in claim 37);

species #8 - particulate material used to form adhesive / used as an adhesive comprising octacrylamide / acrylates / butylaminoethylmethacrylate (apparently defined in claims 56 and 74);

- Application/Control Number: 09/706,350

Art Unit: 1733

species # 9- particulate reactant used to form adhesive comprising sodium carbonate or potassium aluminum sulfate (apparently defined in claim 59)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of the method for three dimensional printing (one of species A-C) and a single disclosed species of the particulate material (one of species #1-#9) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and <u>a listing of all claims</u> readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

¹ If applicant elects species C and either species #1 or species #2, then both species #1 and #2 would be examined with species C (In species C, #1 and #2 are subcombinations usable together instead of species).

. Application/Control Number: 09/706,350

Art Unit: 1733

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 2) Rejoinder of some or all of the species will be considered upon indication of allowable subject matter depending on the basis thereof.
- 3) A telephone call was made to Gary Engleson on 4-4-03 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 4) Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 5) Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven D. Maki whose telephone number is 703-308-2068. The examiner can normally be reached on Mon. Fri. 7:30 AM 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Ball can be reached on (703) 308-2058. The fax phone numbers

, Application/Control Number: 09/706,350

Art Unit: 1733

for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
